

Subgrid

Column subgrid — independent rows share the parent's columns

Each .row is its own grid with `grid-template-columns: subgrid`; its three cells align to the parent's 120pt 1fr 80pt tracks.

Item	Wireless keyboard	\$49
SKU	A very long descriptive value that stretches the flexible middle column	\$7
Total	Two line items	\$56

Row subgrid — card bands align across the deck

Every .card spans the same three parent rows with `grid-template-rows: subgrid`, so the title, body and footer bands line up even though each card's body is a different length.

Starter	Pro	Team
Everything you need to get going.	A longer description that wraps onto several lines so this card's body band is the tallest of the three, and the shared row grows to fit it.	For groups.
