

Margin-box image alignment

The peach logo appears three times across the top margin: flush to the left in `@top-left`, centered in `@top-center`, and flush to the right in `@top-right` — each placed purely by the margin box's default alignment, with no explicit box width.

In the bottom-left box the logo carries an explicit `text-align: right`, so it hugs the right edge of its box instead of its default left.
