

Modern CSS Colors

A utility-framework-style palette authored entirely in `oklch()`, plus `oklab()`/`lab()`/`lch()`/`hsl()`/`hwb()` and `color-mix()` opacity modifiers — all resolved to real PDF colors.

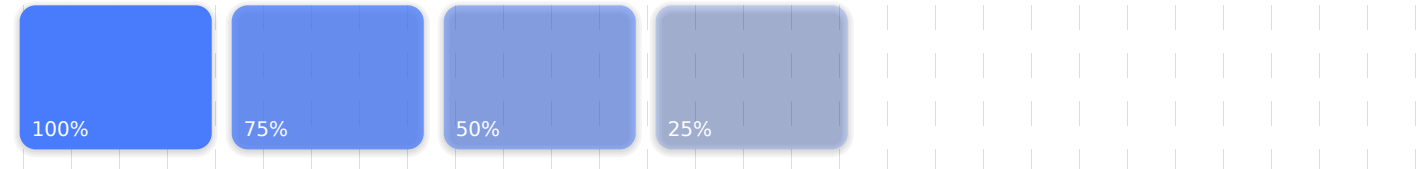

oklch() palette (constant lightness & chroma, hue sweep)

Other color spaces

color-mix() opacity modifiers (over a checkerboard)

color-mix() with a hex operand (Tailwind v4 opacity-modifier shape)

color-mix() blends
