

# Responsive @media

desktop layout — width  $\geq 60\text{rem}$

## Fast

Pure .NET, no external process — the same engine at every page size.

## Responsive

Breakpoints select by the page-box width, not all at once.

## Range syntax

Both min-width and width  $\geq 48\text{rem}$  work.

## Dark mode

prefers-color-scheme is driven by config.

## Print-aware

Static-document features report their resting state.

## Standards

Media Queries 4 feature evaluation over the page box.
