

SVG Text: Arabic-Family Joining & Devanagari USE Reordering

The same real joining-form resolution, GSUB shaping, and USE syllable reordering as HTML text (see the two showcases above), now applied inside a native SVG `<text>` element.

Positional joining forms (Beh-Yeh-Teh, direction="rtl")

بيت

Lam-alef ligature (rlig), direction="rtl"

لا

GPOS cursive attachment (Aref Ruqaa), direction="rtl"

بيتالف

Devanagari pre-base matra / conjunct / reph reordering

कि क्षि किं

Mixed script: Latin, embedded Arabic, embedded Devanagari in one line

Hello بيت कि
