

A decorated inline-block is underlined under its text only

Icon-only link (no text) - no line at all

on a coloured header: the link colour used to be drawn as a bar across the icon

Short text in a wide box - the line covers the text, not the box

inline-block, 220pt wide, containing "ab"

[ab](#) followed by more text on the same line

Wrapped text - one line per text line

inline-block, 90pt wide

[aaa bbb ccc ddd](#)
[eee fff](#) and text beside it

Padding and a border are not underlined

the box's own padding and border sit outside its inline content

[padded tag](#) [another](#)

Truncated link - the line stays inside the clipped box

overflow: hidden, white-space: nowrap on an 80pt box; the line is clipped with the text

[A long link ti...](#) and text beside it

inline-flex

an item's text is underlined, the rest of the 220pt container is not

[flex item](#)
