

text-underline-offset & text-underline-position

Both were previously unimplemented and silently dropped. text-underline-offset moves the line further from (or closer to) the text; text-underline-position chooses where it starts from before that offset is applied.

auto (default)	<u>Hambur</u> gefonstiv
offset: 6px	<u>Hambur</u> gefonstiv
offset: -2px	<u>Hambur</u> gefonstiv
offset: 25%	<u>Hambur</u> gefonstiv
position: from-font	<u>Hambur</u> gefonstiv
position: under	<u>Hambur</u> gefonstiv <u>gjpqy</u>
